POST LANTERN INSTALLATION INSTRUCTIONS

Installation is to be by a qualified electrician in accordance with all applicable electric codes.

1. Post Lantern light fixture by TWO HILLS STUDIO. Actual shape may vary.
2. Inner metal pan attached to the post top with appropriate fasteners. Compress gasket against top surface of post to prevent water from entering the electrical junction box.
3. Electrical junction box by others. Turn off electricity to electrical box before installing the fixture. If a junction box is not used, extend the conduit containing supply wires to 3/4" above the top of the finished post surface.
4. Connect ground wire from junction box to ground wire from the fixture. Connect black & white wires from fixture to corresponding black & white wires from junction box using appropriate wire nuts.
5. Fasten the fixture to the inner metal pan with the threaded nipples & cap nuts inside the fixture body.
6. In most models the roof is removable for relamping by removing set screws indicated on the fixture. Use only the bulbs indicated on the fixture.
7. Fixtures are for 120 volt power supply unless labeled otherwise. Connect only to a power supply of the proper voltage.
