

HEAVY (>50#) HANGING LANTERN

# INSTALLATION INSTRUCTIONS

Installation is to be by a qualified electrician in accordance with all applicable electric codes.

1. Light fixture by TWO HILLS STUDIO. Actual shape may vary.
2. Electrical junction box by others. **TURN OFF ELECTRICITY TO ELECTRICAL BOX BEFORE INSTALLING THE FIXTURE.**
3. Connect ground wire from the fixture to corresponding wire from junction box using appropriate wire nuts. Tuck excess wires into the junction box.
4. Connect black & white wires from the fixture to corresponding black & white wires from the junction box using appropriate wire nuts. Tuck excess wires into the junction box.
5. Fasten the fixture canopy to wood blocking in ceiling using flat washers & lag bolts. (Wood blocking in ceiling by others.) Do not attach fixture to junction box!
6. In most models either the top or bottom of the fixture is open for re-lamping. In other cases a hinged panel is provided. Use only bulbs indicated on the fixture.
7. Fixtures are for 120 volt power supply unless labeled otherwise. Connect only to a power supply of the proper voltage.
